

► Pilz Licensed Instructor Training, PilzLIT

As a solutions supplier, Pilz provides customers with products and services that encompass the entire machine lifecycle.

Our comprehensive range of trainings in the field of machinery safety and automation, along with our expert trainers, allow us to offer our newest program, the Pilz Licensed Instructor Training.

With the PilzLIT program, we can help you design a custom training program utilizing our existing training modules, your company-specific requirements, or a combination of the two. Our team of expert trainers will work with you to ensure your trainers have the strong foundation in critical training skills needed to successfully train your employees, whenever and wherever needed. The Pilz team can also create a test for each course, allowing you to fully assess your employee's knowledge level, before and after a course. You can also elect to have a Pilz trainer proctor a class and provide constructive feedback to your trainers to ensure best results.

Let Pilz, your professional training partner, lead you to the machinery safety training success your employees require.

Pilz provides

- ▶ All machinery safety training materials
 - Current Pilz training modules
 - Training materials derived from your company-specific standards and requirements
 - Any combination of the above
