

▶ Product Discontinuation

PNOZmulti 1

Pilz continuously assesses its product portfolio to see how best to meet the needs of customers and companies. The first generation of PNOZmulti systems was built with traditional electronics parts, which are no longer produced due to the strong evolution in the electronics world. Therefore, they have decided to discontinue production of the PNOZmulti 1 range. The process of phasing out of PNOZmulti Classic and Mini will be implemented step by step and it will be completed by 2024. The availability of PNOZmulti Classic and Mini finally ends on 31.12.2024.

New generation PNOZmulti 2

For several years Pilz has had an excellent successor in its portfolio, the new generation PNOZmulti 2. The modular small controller PNOZmulti 2 offers improved functionality, is more efficient and operates faster. The PNOZmulti 2 is also more compact, thus saving space in the electrical cabinet.

- ▶ **Made-to-measure costs:** can be adapted exactly to the application by means of expansion modules
- ▶ **Fast time-to-market:** inputs and outputs can be freely configured in the PNOZmulti Configurator software tool
- ▶ **Fast commissioning:** simple writing and exchangeable program memory
- ▶ **Easy diagnosis** thanks to integrated, illuminated display
