**Save-the-date - Safety + Automation
Expert Forum, for the first time at
Moulding Expo in Stuttgart - Safety +
Automation Expert Forum 2023**

Ostfildern, 22.03.2023 - **The popular expert forum “Safety + Automation” has a new home: For the first time, the lecture programme will take place as part of the Moulding Expo at the Messe Stuttgart (14 June 2023). At the meeting point for machinery safety, visitors are given practical tips on the trending issues in safe automation. Moulding Expo is the most important European Trade Fair for Tool, Pattern and Mould Making in 2023 and so forms the perfect setting.**

Visitors to Moulding Expo will find the expert forum in the Atrium next to Hall 1, directly at the east entrance. The focus is on practical applications from the field of machine safety, including safety and security in tool and mould making: the latest developments in EN ISO 13849-1 or the new Machinery Regulation, for example.

In the wide-ranging lecture programme, visitors discover all the important facts around safety and security. All lectures can be attended individually depending on your personal focus, and there's no need to register in advance. There's no charge for trade fair visitors.
