Save-The-Date - on 8 October 2024, two specialist forums at Motek and IN.STAND will be offering concise insights into trending issues in safe automation - two specialist forums: one ticket - double knowledge

Ostfildern, 09.07.2024 - **In addition to the classic trade exhibition at the two trade fairs in Stuttgart, the first day (8 October) will feature real know-how transfer in the form of specialist forums: both at the specialist forum “Maintenance powered by PILZ” as well as at the specialist forum “Safety + Security in Automation”.**

Experts from science, associations and industry will share their expertise as part of a wide-ranging programme of presentations. The spectrum of topics ranges from “Safety and Security” and the current “Status of the new Machinery Regulation” to questions about “Safe Production” and the increasingly important role of “Sustainability in Companies”.

The presentations can be attended individually depending on your personal focus, and there’s no need to register in advance. There’s no charge for trade fair visitors.

Pilz - The Spirit of Safety

Pilz is a global supplier of products, systems and services for automation technology. As a pioneer of safe automation, Pilz creates safety for human, machine and environment. Founded in 1948, today the family business with its head office in Ostfildern is represented worldwide with 2500 employees in 42 subsidiaries and branches.

The technology leader offers complete automation solutions for Safety and Industrial Security on the machine. These include sensor, control and drive technology - as well as systems for industrial communication, diagnostics and visualisation. An international range of services with consulting, engineering and training completes the portfolio. Pilz solutions are used in many industries beyond mechanical engineering, such as intralogistics, packaging, railway technology, or the robotics sector for example.
