New training program for 2022 from the Pilz Academy - Fit for safety and automation!

Ostfildern, 23.02.2022 - **The 2022 training offer from the Pilz Academy has its finger on the pulse, and not just because of the digital formats. Subjects and content are also state of the art, delivering specialist knowledge on machinery safety, plant operation and maintenance, production and automation.**

Fit for the future – Pilz's training offer takes care of it where safety for human and machine is concerned. As an expert in safe automation, for many years the company has been sharing its expertise with operators and manufacturers of plant and machinery - tailor-made, from entry level to expert standard. Also in 2022, the Pilz Academy will be offering both face-to-face events and online training, as well as hybrid professional development. The training content also has its finger on the pulse, covering the latest specialist knowledge. Equipped with this expertise, participants can confidently face the current challenges of machinery safety, plant operation and maintenance, production and automation.

Become an expert on safe AGV systems with Pilz

The 2022 training brochure provides an overview of all professional development opportunities.

With the course "Safe use of automated guided vehicle systems" (AGV systems), Pilz provides all the information you need about the key requirements of the safety of AGV systems, particularly when used in intralogistics. In contrast, the "Fundamentals of Machinery Safety" course covers essential information on the subjects of CE marking, protection methods, safety components and the design and validation of control systems in accordance with EN ISO 13849 and EN IEC 62061.

Further information, with the option to register directly, is available at www.pilz.com/training.
