The Pilz Group and Pintsch GmbH enter into a development partnership - Strong partners for safe, digital rail

Ostfildern, 21.09.2022 - **The automation company Pilz and the expert in safe rail infrastructure, Pintsch, are to enter into a long-term development partnership. In future, the companies will work together to develop solutions for the digitisation of the rail infrastructure.**

New, innovative solutions will emerge from the combination of industry-proven control solutions from Pilz and the safety-related rail expertise of Pintsch. In the process, Pilz and Pintsch aim to respond to the challenges of modernising the [rail infrastructure](#) in Germany and Europe.

Two strong partners

Susanne Kunschert, Managing Partner of Pilz GmbH & Co. KG, and Tilo Brandis, Managing Director of Pintsch GmbH, sealed the development partnership on 21 September 2022, during InnoTrans in Berlin. "With the "Digital Rail for Germany" programme and the planned investment from the Federal German government, the demand for innovative, digital solutions is set to rise consistently. With Pintsch, we are delighted to have one of the most renowned and experienced partners at our side, enabling us to develop and supply further solutions for safe, digital rail infrastructure", explains Susanne Kunschert, adding: "This cooperation is an important success for our newly founded Business Unit Rail."

"Digitisation and automation of signalling technology is a basic requirement for increasing the capacity of the rail infrastructure. By cooperating with Pilz, Pintsch is exploring new horizons", adds Tilo Brandis. Pintsch is one of the leading suppliers of safety-related components, systems and solutions for rail infrastructure.

Pilz - The Spirit of Safety

Pilz is a global supplier of products, systems and services for automation technology. As a pioneer of safe automation, Pilz creates safety for human, machine and environment. Founded in 1948, today the family business with its head office in Ostfildern is represented worldwide with 2500 employees in 42 subsidiaries and branches.

The technology leader offers complete automation solutions for Safety and Industrial Security on the machine. These include sensor, control and drive technology – as well as systems for industrial communication, diagnostics and visualisation. An international range of services with consulting, engineering and training completes the portfolio. Pilz solutions are used in many industries beyond mechanical engineering, such as intralogistics, packaging, railway technology, or the robotics sector for example.
